

## Homeowner Checklist for Mitsubishi Heat Pump Installation

### Before the Installation

- Schedule your home evaluation.
- Review recommended indoor unit locations.
- Approve the outdoor unit location.
- Confirm electrical requirements.
- Understand the installation plan.
- Prepare the space.
- Secure pets.

### During the Installation

- Confirm interior and exterior protection.
- Ask about line-set protection.
- Review mounting height and placement.
- Ensure refrigerant lines are properly handled.
- Verify communication & power wiring.

### After the Installation

- Full system testing.
- Review how to use the system.
- Confirm warranty activation.
- Understand basic maintenance.
- Schedule annual maintenance.

### Optional (But Smart) Steps

- Photograph the installation.
- Keep your invoice & equipment list.
- Ask about energy-saving settings.
